Test Comments: Like most of the Delmarva, this test had enough timely rains and temperatures never got too excessive. Corn seedlings emerged well after planting and continued to look good all season long. Disease never got an handle and at harvest, corn was standing excellent except for tops that went broke off due to late-season corn borer. Overall rating of the plot is an 8 out of 10.

† See last page for footnote information. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
