Test Comments: Excellent test plot with tall plants and very strong stalks and well developed brace roots. Some ears were short but all were girthy and filled with kernels to the tip. This site received heavy rains after planting and seedling emergence. Some water pooling occurred on the test but minimal impact was noticed. Tom stated that the area went 80 plus days with no rain.

† See last page for footnote information. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
