LSD (0.10) = 15.1 1.0 ns

Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.5 Drying = \$0.030 Price = $\frac{\$4.50}{\$4.50}$ Local GMO non-GMO

Test Comments: *Plant root systems started the season in cool and wet soils until mid-June. The delay in planting date due to chronic wet conditions during the first half of May also pushed back pollination until first week of August. Plant health was excellent during the vegetative stages but conditions turned dry in August through maturity limiting grain fill. Shorter ear length and tip back was observed at harvest.*

† See last page for footnote information. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
