**Test Comments:** Due to the wet spring weather in this area, planting was delayed here. The site turned out quite uniform, delivering good yield and quality results. Ears were filled with kernels to the tip of strong cobs making shelling kernels off the cob pretty easy. Plants had retained most leaves and ear shanks remained strong. Tall plants, heavy ears and weak stalks resulted in plants falling over during harvest.

† See last page for footnote information. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
