**Test Comments:** *Nice planting conditions with good emergence made for a nice final stand. The weather conditions were conducive for Anthracnose, northern corn leaf blight, rust (light) and gray leaf spot (light) disease development. The crop stood well at harvest with light lodging. Cob strength varied from soft to hard. Grain quality varied from shallow to deep kernel set. Grain moistures were drier than expected.*

† See last page for footnote information. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
