Test Comments: *Better than expected yields in the area known for the roller coaster weather this season. A nice crop to harvest as plant health was some of the best I have seen this fall. High grain quality as test weight was 57 to 60 pounds per bu. with a nice bright color. Crop was fully intact at harvest with all tassels and leaves present. A dirty crop to harvest as the combine was black when finished.*

† See last page for footnote information. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
