TEST COMMENTS: Emergence was good as final stand was at to just below the seeding rate. The crop stood well at harvest as some plant height was over 50 inches tall. Seed size and pod fill was sporadic this season. Bean size ranged from normal down to BB. The bean count per pod ranged from 0 to 4. The month of August was very dry in this area with total rainfall just over 0.3 inches of rain.

† See last page for additional information. Results in **bold** are significantly above the test average. **CK** = check and **GC** = grower comparison products, **§** = United Soybean Board entry; **ns** = not significantly different.
