Test Comments: *The Central City test site is well drained which prevented the 11" inches of June rainfall from pooling to reduce yields like many of our test locations this year. Plant health was very good here. Nearly all foliage remained attached to stalks. Plant root balls were quite large. Ears were large, well pollinated and girthy with strong ear shanks. Stalks remained strong at harvest with no lodging noted.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
