**Test Comments:** This trial site had ample rainfall, especially in June receiving around 11" and August 5.7". At harvest, plants had ears with a full kernel set of deep kernels. It was nice to see sturdy cobs here to make shelling off the cob easy. Stalk strength was quite good even with a 30 mph wind blowing during harvest, no lodging was observed. No major disease problems or weed pressure issues to impact yields.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
