Test Comments: *Weather shortly following planting turned cool for nearly a week. June rainfall totaled nearly 14" with a large storm bringing 3.6" on the 16th. Soils were saturated through June but no ponding occurred. July to mid-Aug turned dry. Very little foliar disease was noted in late Aug except some common rust. Below average temps prevailed for much of June through July then again in early Sept.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD (0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
