**Test Comments:** Terry commented about the abundance of rain this year. He equipped his combine with tracks to overcome muddy fields. As you would expect with the rain, corn disease was moderately high here. Plant heights averaged 7-10 feet. Ears had good tip fill, but some hybrids did not flex much giving shorter ear lengths. Kernel depth was mostly good. Lodging scores reflect both root and stalk lodging.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different

**Test Comments:** Terry commented about the abundance of rain this year. He equipped his combine with tracks to overcome muddy fields. As you would expect with the rain, corn disease was moderately high here. Plant heights averaged 7-10 feet. Ears had good tip fill, but some hybrids did not flex much giving shorter ear lengths. Kernel depth was mostly good. Lodging scores reflect both root and stalk lodging.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
