**Test Comments:** Kevin noted that August was an extremely wet month. Abundant rains pushed some hybrids to top-end yields, while others may not have embraced wet soaked roots. Lodging in these tests was minimal, however; a few hybrids expressed considerable root lodging. Gray leaf spot pressure was moderately high. Grain quality, kernel depth, and tip fill were excellent. Plant height range was 7-10 feet.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
