Test Comments: Roger said an August 26 thunderstorm root lodged his fields. The last two months brought relentless rains delaying harvest here. One rain event 3 weeks ago accounted for nearly 8 inches. The trials had considerable root and stalk lodging. It was so bad, trials had to be harvested in one direction. Leaf disease pressure was moderately high. Exceptional ear development, tip fill & kernel depth.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
