**Test Comments:** *This location received heavy rainfalls shortly after planting that reduced stands in a good portion of the hybrids. Cool wet conditions continued during the month of June. As a result, most hybrids were short with medium height ear placement. There was evidence of Anthracnose in the test, with some hybrids experiencing premature death. Ear shanks and stalks were still strong at harvest.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
