**Test Comments:** *At harvest most of the corn stalks were standing well and had a lot of leaves on them. The stalk lodging that I saw was slight and seemed to follow specific hybrids. We planted this site later than normal and the moderate temperatures this season made growing degree days lag behind all season. I was happy to see the corn had dried down well for harvest. Good yields and test at this location this year.*

Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different

**Test Comments:** *At harvest most of the corn stalks were standing well and had a lot of leaves on them. The stalk lodging that I saw was slight and seemed to follow specific hybrids. We planted this site later than normal and the moderate temperatures this season made growing degree days lag behind all season. I was happy to see the corn had dried down well for harvest. Good yields and test at this location this year.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
