TEST COMMENTS: *This area was blessed by missing some of the heavy rains this fall. Early season weather conditions were good, not as rough as other areas. The area bean yield was 70+ bu/acre. A light infestation of frog-eye leaf spot was the only disease noted. This crop was up to 48 inches tall. High winds caused some severe lodging, some plots were flat on the ground. No barren pods were seen here.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
