TEST COMMENTS: *The soybeans were mid-thigh in height and were fully mature at harvest. Other than some volunteer corn, the test was weed-free. Total June rainfall was 10.69 inches, 6.33 inches above the 30-year average here. One replication was removed due to odd yield variations. This area missed the September 14 frost. As a result, this soybean crop has been slow to mature this year, delaying harvest.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
