**TEST COMMENTS:** *Lewis is happy with soybean yields this year as some fields averaged over 50 bu/acre, excellent for this area of the state. Some pods abortion occurred in August as a dry spell lingered from July through August. The test was very clean and all varieties were fully dried at harvest. There was some water damage to 1 test replication resulting in only 2 replications being used at this site.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
