**Test Comments:** *Very good planting conditions with a mellow seed bed and moist conditions delivered very good emergence. The test was located on a hillside with good drainage. Plants were tall, with short, girthy, well pollinated ears containing deep kernels. Ear shanks and cobs were strong to make shelling easy. Moderate level of leaf blight noted. Stalks showed signs of weakness but were standing well.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
