Test Comments: *Plant emergence looked very good at this site. Early season cool rains were plentiful but thanks to good drainage, there was no ponding. Despite the wet stress, ears were well pollinated with very good girth strong shanks and strong cobs. At harvest, the tall well matured plants showed signs of stalk weakness and most foliage was removed. Leaf blight was present at this site.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
