Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.5 Drying = \$0.038 Prices: GMO = \$3.50; non-GMO = \$3.50

Test Comments: *Favorable weather allowed for planting in late April here. Many area fields were planted by mid-April. Good stands and early season vigor were a result of timely rain early that continued all season without dry periods or flooding. Aside from some Northern corn leaf blight, yield wasn't limited. Ears were well pollinated with deep kernels. Conditions this year favored later maturing hybrids at this site.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
