**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$4.00; non-GMO = \$4.00

**Test Comments:** *I'm going to agree with Shawn, there has been a black cloud hanging over this site. Water damaged crops here just like other areas from 7" rain in June and 9" in July. The crop was standing perfect with all leaves intact and some were green. Stands were thinned in areas. Yields were reduced in saturated areas creating inconsistent and unreliable yield results to draw conclusions from. Data Rejected.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different

**Test Comments:** *I'm going to agree with Shawn, there has been a black cloud hanging over this site. Water damaged crops here just like other areas from 7" rain in June and 9" in July. The crop was standing perfect with all leaves intact and some were green. Stands were thinned in areas. Yields were reduced in saturated areas creating inconsistent and unreliable yield results to draw conclusions from. Data Rejected.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
