**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.40; non-GMO = \$3.40

**Test Comments:** *Planting conditions were challenging, due to moist conditions and uneven residue from the previous sweet corn crop. The effect of these conditions was evident in non-uniform stands measured in early June. The corn stand and yield variability in the test area was evident in the surrounding field as well. These inconsistent results are not reliable for drawing conclusions from so data is rejected.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceeded the grain moisture limit for this test. **ns** = column values not significantly different
