**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.53; non-GMO = \$3.53

**Test Comments:** *This area received lots of rain in May and June, fortunately we got the site planted before then. The test had adequate surface drainage, no tile drainage, and no signs of ponding. Brent stated that area pattern tilled fields had strong yield benefits this year. At harvest, plants looked very good, upright with strong stalks, well pollinated long but narrow ears and strong cobs which made shelling easy.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different

**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.53; non-GMO = \$3.53

**Test Comments:** *This area received lots of rain in May and June, fortunately we got the site planted before then. The test had adequate surface drainage, no tile drainage, and no signs of ponding. Brent stated that area pattern tiled fields had strong yield benefits this year. At harvest, plants looked very good, upright with strong stalks, well pollinated long but narrow ears and strong cobs which made shelling easy.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
