Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.60; non-GMO = \$3.60

Test Comments: *Season started off excellent at this location. Planting conditions were ideal and almost every seed emerged evenly. By the time June rolled around, rainfall was becoming plentiful. Crop conditions remained good for the entire season. There was evidence of some gray leaf spot and Northern corn leaf blight in the plot. Lodging was due to wind damage. Overall it was a nice uniform location.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
