**Test Comments:** *It's hard to believe that this test had water standing on it this spring after emergence, because the creek went over it's banks. Emergence was excellent and corn was nice and uniform at stage V5. Favorable rainfall throughout the growing season made for some excellent yields. This soils water holding capacity helped carry the crop. Excellent pollination and ear fill really helped deliver top-end yield.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
