Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.045 Prices: GMO = \$3.50; non-GMO = \$3.50

Test Comments: *This site got hit with a wind and hail storm in mid-August which caused crop damage. At harvest, plants were around 6 feet tall, shorter than most tests harvested so far. Stalk lodging was common and varied greatly between hybrids. Corn grain moistures were very dry with 11% being common. Ken reported lots of down corn in the field around the test and disappointing yields in the field.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
