Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.045 Prices: GMO = \$3.50; non-GMO = \$3.50

Test Comments: *This site went from mid-July to mid-August without a rain which hurt yield potential. We had very strong winds on October 11th that caused stalk lodging and ear drop that impacted yield and increased yield variability. The full-season test had greater wind damage than the early-season test. Conditions were very dry leading up to harvest resulting in corn moistures being below 15 percent.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
