Test Comments: *Stands at this location were great and plants were all uniform at the V4 stage. Consistent rains for most of the growing season helped to produce a nice uniform location. Some of the fuller season hybrids still had some green stalks and leaves that were frosted a week ago. Stalk quality on all hybrids was still excellent at harvest. Dry down the last part of the season was phenomenal.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
