TEST COMMENTS: *This site was very difficult to harvest due to lodging. In late June, plants grew very fast and began falling over. The stem bases were large but narrowed in the middle to make plant stems weak. Plants were well matured at harvest, full of pods that contained small sized seed. Fortunately, the site had no problems with drainage to minimize ponding from above normal area rainfall.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
