TEST COMMENTS: *After emergence, the test was struggling but then filled out very well. At harvest, plants averaged 42 inches tall and were full of pods. Seed size seemed small. Plants were well matured with all leaves dropped and pods shelled with ease, except for later maturity varieties. No lodging problems or weed escapes noted. Varieties did well to overcome the wet cool growing season with good yield.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
