**Yield & Income Factors:** Base Moisture = 13.0% Shrink = 1.3 Drying = \$0.020 Prices = \$9.00 GMO; \$9.00 non-GMO

**TEST COMMENTS:** Plant height varied from 18" to 38". Where water stood longer, plant stand was thin and height was short. Some light disease pressure in the stunted plants with some beans molding in pods. Bean size varied from BB to normal. Data rejected because variety yield across 3 replications vary by up to 40 bu/acre due to standing water. Results unreliable for identifying high yielding varieties.

† See last page for abbreviation descriptions. Results in bold are significantly above test average by LSD (0.10). ns = column values not significantly different.
