TEST COMMENTS: A mid-May rainfall event dropped 7 inches to delay planting. Cool and wet conditions prevailed the first half of the season, with several rains being heavy. Joe applied Stratego YLD fungicide for plant health, and sprayed Silencer/Nufos and Brigade twice for aphids. Yields are quite consistent across fields this year. The field surrounding this test averaged 57 bpa.

† See last page for abbreviation descriptions. Results in bold are significantly above test average by LSD (0.10). ns = column values not significantly different.
