**TEST COMMENTS:** *This was a nice uniform location that started off great this spring. Emergence was great and plot was even early on. Heavy rainfall in June really stunted the plant growth. Plants were all short, but there was an excellent pod set and seed size was above average. There were some stem diseases present at harvest and evidence of SDS in small pockets. To look at the beans, yields were surprising*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
