TEST COMMENTS: Soybeans emerged excellent at this location and had a favorable growing season. Plants were all standing well with large diameter stems. There were several varieties that were holding green stems, but the beans were good and dry. Some of the lower yielding varieties had symptoms of SDS present. Seed size was nice and large and plants were podded all the way to the top of the plant.

† See last page for abbreviation descriptions. Results in bold are significantly above test average by LSD (0.10). ns = column values not significantly different.
