Test Comments: *Good stands and early season vigor were a result of timely rain early that continued all season without dry periods or flooding. No foliar diseases or significant insect issues observed here. Late season rains enabled plants to add test weight just prior to black layer. Largest rain events were 2" Aug 11, 2.1" Aug 19 followed by 4.5" Sept 5-9. Rainfall from planting to maturity was 7.5" above normal.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
