**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.20; non-GMO = \$3.20

**Test Comments:** Emergence at this location was great and early season growth was uniform within most of the plot area. The early season test was in a spot that received some slight soil saturation at times and my have caused some possible denitrification. Stalk health on the lower plant portion was still good with very little disease. Roots showed very little signs of any insect pressure. Overall a very nice plot.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
