Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.20; non-GMO = \$3.20

Test Comments: *This location was planted in a timely manner and achieved nice even emergence. Uniform soil profile and favorable weather during the entire growing season, resulted in excellent uniform trials. At harvest, there was very little evidence of any diseases present on corn plants. Stalk quality was still good. The recent warm weather trend really helped speed up in-field grain drying of all hybrids.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
