**Test Comments:** *This location was planted early in the spring and achieved almost perfect stands. The test was located on a gently sloping side hill that provided excellent drainage. Stalk quality was still nice and healthy for the majority of the hybrids. Most lodging scores reflect root lodging. Good ear girth and kernel depth noted. There was a noticeable amount of leaf diseases throughout most of the plot.*

**Test Comments:** *This location was planted early in the spring and achieved almost perfect stands. The test was located on a gently sloping side hill that provided excellent drainage. Stalk quality was still nice and healthy for the majority of the hybrids. Most lodging scores reflect root lodging. Good ear girth and kernel depth noted. There was a noticeable amount of leaf diseases throughout most of the plot.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
