LSD (0.10) = 21.3 0.6 ns

LSD (0.25) = 14.7 0.4 ns

Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.00; non-GMO = \$3.00

Test Comments: *Planting conditions were good and timely this year. Cool weather followed planting, slowing plant growth. On June 20, plants were in the V4 growth stage and relatively short. Harvest weather has been wet with saturated soils making the harvest process a challenge. One replication was removed from the ultra early test due to poor drainage which reduced plant height and yield.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
