Test Comments: We had a rain event in June that cause some pooling in portions of the full-season test. To eliminate the effect on yield, 1 replication was removed from the full-season test. Only had minimal impact was noticed in the early-season test. An extended dry period in July reduced yield potential in this plot. Harvest conditons were good and the crop was standing well.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
