Test Comments: *Stands were excellent, with good early season vigor. This is a new location for us with a lighter sandier soil, but nice & uniform. Plants were nice and healthy with full ears. Ears were all pointed down and the ear shanks were still holding good. Over two thirds of the plots had the tops blown out, but everything was above the ear. There was a lot of common rust present on the leaves that were left.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
