Test Comments: *Corn looked great all season long. Not under stress for any period of time. With the big yields, some hybrids did not stand well in a late October storm. This test is a good stalk strength evaluation. Some hybrid stalks broke at the soil level making them hard to harvest. Other stalks broke higher above the soil and were easier to gather into the combine head. Overall test rating is 8 of 10. (10=best)*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
