Test Comments: *Planting conditions were very good then temps dropped during germination. Plants looked very good in late June.*

Despite very dry July and August conditions, ears were well pollinated, short and girthy. Plants still had green foliage at harvest. Gray leaf spot and rust were noted. Matt indicated that impact of dry weather can be seen in his yields but are surprisingly better than expected.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
