**Test Comments:** Plot started with good planting conditions and favorable weather that lead to excellent stands. Hybrids were nice and uniform all the way through pollination. Caught some nice rains until September when it turned off dry. Corn finished off nice for not having much heat this summer. Ears were filled to the tip and had a nice deep kernel set. Stalk quality was still good at harvest with little disease.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
