**Test Comments:** Emergence was fairly decent at this location and early season growth was good and uniform. May through August was nice and rainfall was good, but heat degree units were a little short. September was dry and by the time we made it to harvest, several foliar diseases and ear molds had set in on some products bad enough that it was noticeable in the grain sample.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
