Test Comments: *All reported that some local elevators are struggling to capacitate this year's higher yielding corn. Some of his corn fields averaged upper 200s. His strip till field may have conserved soil moisture necessary for higher yields. Plant height ranged from 8-12' tall. Ear tip fill was very good.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
