**Test Comments:** Site planted in great soil conditions that produced uniform emergence and stands. The weather was kind to this site. Although summer rains were spotty, the corn pollinated great and must have caught enough showers afterwards to fill kernels. Ears were mostly filled to the tip, deep kernels, and excellent quality. Plant height ranged from 7 to 9 tall. Lodging was nearly nonexistent.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
