Prev. years average yield, 209.2 bu/a, 11 yrs

**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.50; non-GMO = \$3.50

**Test Comments:** *The planting conditions at this site were ideal but the weather that followed were less than perfect. Two weeks of cold wet weather hurt seedling emergence at this plot. Steve, our host farmer, thought it best to tear up the first planting and replant the entire field while there was ample growing season left. The decision was made to abandon the plot as stands were too erratic to yield quality data.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
