**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.50; non-GMO = \$3.50

**Test Comments:** *This site was planted into good soil conditions. Heavy rains that followed planting caused some severe soil surface crusting. The crust prevented emergence of many seedlings. Much of the planted corn seed rotted under the crust. The poor stand was justification for abandoning the test to allow the cooperator to tear up the entire field and replant.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
